Corner Unit					

# Flatweave Corral

Smaller slots are ideal for indoor/outdoor rugs. Comes as standard with 6 slots by 3 but can be made with any number of slots. 96cm wide by 51cm deep.

## Display

Mastercraft Rugs can help you with in-store displays.

There are four main types available on a free on loan provided they are used for our collection basis:

**Sliding Rail Systems** - available in 1 or 2 bay systems, enabling you to display between 15 to 70 rugs. Used to show rugs in either 160 x 230cm, 200 x 290cm, or even 240 x 340cm. Tickets can be made with your logo to show the different sizes available. Lighting rigs optional. Ceiling height has to be as per dimensions table overleaf.

Probably the best systems to sell from as the customer can view the entire rug easily and in good light. The rails can be suspended from a strong ceiling.

**Swing arms** - the most popular allowing a large number of rugs to be shown in a compact area. Each arm displays 2 rugs and works like a book, the customer flicking through each page to view. Can be custom made to fit an area. It's also possible to have them wall mounted to a solid wall.

**Rug beds** - keeps rugs off the floor and the customer can view the carpet as it will be at home. Popular for shaggy and plain ranges but good for all. Circular and runner beds available too.

**Display bins** - or corrals - rolled up rugs in a compact area. Standard sizes are 1.83m long with three rows of slots. Can be made smaller or larger. Flatweave corrals also available with smaller slots.
